

RISE of the Agents

A keynote for executive teams, conferences, and leadership summits about the new class of operators who can make agentic AI useful without handing control to the machine.

RS Mills / DigixData

Agentic-AI speaking, workshops, consulting, and operator education.

Audience Fit

For leaders who can feel the shift but need a sharper language.

The talk frames the AI transition around work, control, and organizational readiness.

It avoids hype and gives teams a shared vocabulary for what comes next.

Talk Arc

Reality shift: agents are moving from impressive demos into actual work.

Operator gap: the missing layer is a human-owned system for intent, context, review, and authorization.

Practical adoption: leaders leave with a map for first workflows, safe gates, and operating rhythm.

Audience Takeaways

A clearer AI story beyond productivity slogans.

A risk-aware adoption map for safe workflow candidates.

A shared operator language: context, gates, queues, proof, escalation, and cadence.

Format

45 to 60 minute keynote with executive Q&A.

Optional workshop follow-up for team translation.

Strong fit for AI transformation, innovation, and operator leadership events.
